
Semiconductor Lasers II Materials And Structures Optics And Photonics By Kapon Eli Published By Academic Press 1999

semiconductor lasers - dvikan - lasers. these are called semiconductor lasers [13]. the original concepts of semiconductor lasers dates from 1961, when basov et al. [2] suggested that emission of photons could be produced in semiconductors by the recombination of carriers injected across a p-n junction. the first p-n junction lasers were built in gaas (infrared) [3] and **ece l10 11012016 ece 4242/6243 part ii notes chapter 7 ...** - ece l10 11012016 ece 4242/6243 part ii notes chapter 7: semiconductor lasers 7.1 introduction (chronology, summary of lasing, cavity, dfb, dbr lasers) 286 7.1.1 general conditions of lasing 288 7.1.2. lasing conditions in fabry-perot cavity lasers 290 7.1.3. resonant cavity modes and mode separation 293 7.1.4. **semiconductor lasers: stability, instability and chaos** - semiconductor lasers [2-6]. ii. laserchaos laser is theoretically described by three variables; the electric field in the laser, the polarization of the laser medium, and the population inversion to induce the laser oscillation. using the normalized variables, electric field x , ... **semiconductor physics gate problems (part - ii)** - semiconductor physics gate problems (part - ii) 1. consider two energy levels: e_1 , e_2 above fermi level and e_3 , e_4 below the fermi level. p_1 and p_2 are respectively the probabilities of e_1 ... thus used for fabricating lasers. in dbg semiconductor during the recombination the energy is released in the form of light. option (c) **semiconductor lasers - springer** - length semiconductor lasers. particular attention is paid to ingaasp lasers, although we also consider semiconductor lasers operating at longer wave lengths. the objective is to provide an up-to-date understanding of semiconductor lasers while incorporating recent research results that are not yet available in the book form. **a review of semiconductor quantum well devices** - semiconductor diode lasers have become the most widely available and important lasers in our daily life (kirti et al, 2010). 3. quantum well detectors an avalanche photodiode (apd) is used to detect optical signal from the visible to the far-infrared of the optical spectrum. this device is grown by epitaxial techniques mbe or mocvd. **surface emitting semiconductor lasers and arrays** - surface emitting semiconductor lasers and arrays edited by gary a. evans southern methodist university school of engineering and applied science dallas, texas jacob m. hammer photonics consulting seaford, virginia academic press, inc. harcourt brace & company, publishers boston san diego new york london sydney tokyo toronto **mode-locked vertical-cavity semiconductor lasers** - mode-locked vertical cavity semiconductor lasers by wenbin jiang in-plane semiconductor lasers can be mode locked to generate ultrashort pulses, but the output power is small because of the gain saturation limitation. vertical cavity surface emitting lasers (vcSEL), on the other hand, have a large gain saturation **opti510r: photonics - wp.opticsizona** - semiconductor lasers introduction p-n junction lasers based on p-n junction lasers based on heterostructure ... insulator valence band is completely full. periodic table group iv semiconductor group iii-v semiconductor group ii-vi semiconductor metal devised 1869 by dmitri mendeleev 118 confirmed elements as of 2011 # of proton. direct and ... **using diode lasers for atomic physics - nist** - an excellent review entitled "coherence in semiconductor lasers" by ohtsu and take' that discusses applications in a variety of areas. ii. basic laser characteristics the basic physics of diode lasers is presented in many references³ and will not be repeated here. however, we do **power conversion efficiency temperature dependence and ...** - ii. theory diode lasers, or electrically pumped semiconductor lasers, are a class of lasers that employ a diode as the gain medium. almost exclusively, a direct band-gap semiconductor is employed in such devices to make up the p-n junction [7]. the emission wavelength is therefore largely dependent upon the choice and band-gap (E_g) of the ... **semiconductor lasers ii - gbv** - claddings for blue-green ii-vi lasers 55 1.6.1.3 reliability of ii-iv lasers 57 1.6.2 gallium nitride-based lasers 59 1.7 conclusions and perspectives toward future developments 62 acknowledgments 63 references 64 chapter 2 long wavelength ($\lambda > 2 \mu\text{m}$) semiconductor lasers 2.1 introduction 71 2.2 wavelength ranges of various laser materials 73 **23. lasers ii - brown university** - semiconductor lasers, sometimes called diode lasers, are pn junctions. electrical current is the pump source. applications: laser printers or cd players. dye lasers use complex organic dyes, such as rhodamine 6g, in liquid solution or suspension as lasing media. they are tunable over a broad range of wavelengths. **spatial and spectral brightness enhancement of high power ...** - spatial and spectral brightness enhancement of high power semiconductor lasers by jordan palmer leidner submitted in partial fulfillment of the requirements for the degree doctor of philosophy supervised by professor john r. marciante the institute of optics arts, sciences and engineering edmund a. hajim school of engineering and applied sciences **zncdmgse as a materials platform for advanced photonic ...** - quantum cascade detectors and green semiconductor disk lasers by joel de jesus adviser: professor maria c. tamargo the zncdmgse family of ii-vi materials has unique and promising characteristics that may be useful in practical applications. for example they can be grown lattice matched to inp **simulation of semiconductor fiber ring lasers for c-band ...** - in this paper, a semiconductor fiber ring laser using a narrow linewidth filter in the cavity is presented. the proposed experimental setup is simulated using vpi transmission maker from vpi photonics corporation [7]. ii. simulation

results the simulated set-up of the tunable semiconductor fiber ring laser is shown in fig.1. **6.772/sma5111 - compound semiconductors lecture 1 - the ...** - 6.772/sma5111 - compound semiconductors lecture 1 - the compound semiconductor palette - outline • announcements handouts - general information; syllabus; lecture 1 notes • why are semiconductors useful to us? (why isn't si enough?) review of the properties of silicon **semiconductors and semimetals volume 22 lightwave ...** - volume 22 lightwave communications technology part c semiconductor injection lasers ii light emitting diodes semiconductors and semimetals are not only beginning to rival conventional literature; they are also beginning to replace it. this is simultaneously a good thing and a bad thing, though the only downsides of this ebook revolution are ... **wide stripe single and dual wavelength mode semiconductor ...** - ii abstract wide stripe semiconductor lasers have a wide variety of applications in remote sensing, in materials processing applications such as drilling and welding, and as pumps for gas lasers. **multilongitudinal-mode dynamics in a semiconductor laser ...** - modulated semiconductor lasers [3], and also squeezing can be realized [4]. to employ this locking technique successfully it is essential to know the stability boundaries for a laser subject to optical injection and to understand the underlying dynamical properties beyond these boundaries. the injection-lock band **23. lasers ii - brown - semiconductor lasers**, sometimes called diode lasers, are pn junctions. electrical current is the pump source. applications: laser printers or cd players. dye lasers use complex organic dyes, such as rhodamine 6g, in liquid solution or suspension as lasing media. they are tunable over a broad range of wavelengths. **mid-infrared semiconductor lasers: recent advances and ...** - •semiconductor basics •3-5 μm semiconductor lasers •resonant optical pumping of type-ii w lasers •temperature limitations •new research directions integrated absorber lasers interband cascade lasers graphene contacts •conclusions **of 1982 1351 bistability and pulsations in semiconductor ...** - harder et al.: bistability and pulsations in semiconductor lasers 1353 opt0 -electronic characteristics of a bistable laser fig. 4. model to explain the current-voltage (i , $-v$,) characteristic of the absorber section for a fixed current I through the gain section. see text for explanation. **fabrication testing and reliability of semiconductor ...** - [pdf]free fabrication testing and reliability of semiconductor lasers ii fabrication testing reliability of semiconductor lasers i download book fabrication testing and reliability of semiconductor lasers ii fabrication testing reliability of semiconductor lasers i.pdf hp journal - online issues sat, 11 may 2019 13:54:00 gmt may-1998. **large-band-gap sic, iii-v nitride, and ii-vi znse-based ...** - metal-oxide-semiconductor technology makes sic the leading contender for high-temperature and high-power applications if ohmic contacts and interface-state densities can be further improved. **self-pulsating semiconductor lasers: theory and experiment** - self-pulsating semiconductor lasers: theory and experiment ... (ii) defects in the active material act as saturable absorbing areas, thus causing absorptive q-switching processes. in the case of self-pulsations caused by saturable-absorbing effects, the self-pulsation **trends in semiconductor laser design - stony brook** - trends in semiconductor laser design: balance between leakage, gain and loss in ingaasp/inp ... emitting lasers is detailed. the effect of the zn doping profile on laser ... in part ii experimental data for $1.3\mu\text{m}$ ingaasp/inp mqw lasers with optimized p-doping profiles are presented. **semiconductor quantum dot lasers epitaxially grown on ...** - h-factor) of silicon based qd lasers. the a h-factor is known as one of the most important parameters of semiconductor lasers, hence driving, for instance, the spectral linewidth and the sensitivity to optical injection or optical feedback.10 at the system level, a large a h also results in a frequency chirp- **the world of compound semiconductors** - 7/14/2004 world of compound semiconductors page 4 of 191 0.2 audience and format audience because of the unique properties of the compound iii-v semiconductors, they have been the source of a rich world of science, technology and applications. this world has, on the science side, led to 7 nobel prizes in physics; and, on the **toward electrically driven semiconductor nanowire lasers** - various semiconductor materials, including metal oxides and ii-vi and iii-v semiconductor alloys, have been used for making nw lasers, which can cover the lasing wavelength across the ultraviolet (uv), visible, near-infrared and mid-infrared spectral regions (370 to 2200nm). uv lasers are particularly useful for sensing, water **stochastic and nonlinear effects in semiconductor lasers** - semiconductor lasers are key elements in optical technologies, being coherent light sources in fiber optics communications, optical data storage, life sciences applications, material processing, and sensing. ... interplay of i) polarization bistability, ii) current modulation and iii) spontaneous emission noise. **lasers in physical therapy - mccc** - lasers in physical therapy ... class ii these are low-power visible lasers that emit above class i ... semiconductor lasers, sometimes called diode lasers, are not solid-state lasers. these electronic devices are generally very small and use low power. they may be built **semiconductor lasers fall 2017 - university of arizona** - semiconductor lasers, f2017 1 r. j. jones optical sciences opti 5111 fall 2017 semiconductor lasers (2 weeks) semiconductor (diode) lasers are by far the most widely used lasers today. their small size and properties of the light output take some getting used to. also these devices are **major disadvantages of leds - ee** - in practical lasers, the are regions with the gain (π) and with absorption. we can say that the gain can be positive (the actual gain) or negative (the absorption) the net laser gain is the difference between the gain in the π region and the absorption in the rest of the laser regular semiconductor material as the absorption coefficient **review of recent progress of iii-nitride nanowire lasers** - review of recent progress of iii-nitride nanowire lasers shamsul arafin, xianhe liu, and zetian mi mcgill university, department of electrical and computer engineering, 3480 university street, montreal, quebec h3a 0e9, canada

shamsulafin@mcgill abstract. one-dimensional compound semiconductor nanolasers, especially nanowire (nw)-**optoelectronic control of the phase and frequency of ...** - semiconductor lasers (scls), which are the basic building blocks of most modern optical communication networks. phase and frequency control is achieved by purely electronic means, using scls in optoelectronic feedback systems, such as optical phase-locked loops (oplls) and optoelectronic swept-frequency laser (sfl) sources. **niloy k. dutta - publications - university of connecticut** - 1 niloy k. dutta - publications . i. books: 1. long wavelength semiconductor lasers , g. p. agrawal and n. k. dutta, van nostrand . reinhold co. n. y. 1986 **accepted by journal selected topics quantum electronics ...** - characteristics of high-power lasers using the thermodynamic based drift-diffusion (or energy transport) model will be pre-sented in section iv. we end with a summary and outlook. ii. description of the optical field a. paraxial parabolic equation the optical field in edge-emitting semiconductor lasers can **ieee journal of selected topics in quantum electronics ...** - the study of the effects of optical feedback on semiconductor lasers is made more difficult by at least three things [17]: (i) the broad gain spectrum which permits higher-order longitudinal mode interaction with small changes in feedback conditions, (ii) strong dependence of crystal refractive index on tempera- **electron-beam pumped semiconductor lasers** - certain aspects, unique to semiconductor lasers, which make them very versatile. among these are: (1) semiconductor lasers are based upon inversion between energy bands rather than atomic or molecular levels and hence can, in principle, be easily tuned over a considerable range of wavelengths, (2) **dynamics of two mutually coupled semiconductor lasers in ...** - dynamics of two mutually coupled semiconductor lasers in low coupling regions masoud seifikar 1;2, andreas amann 3, fabien dubois , alison h. perrott , and frank h. peters1;2 abstract—we study a system of two mutually delay-coupled semiconductor lasers for integration in a photonic integrated circuit. **blue sky research introduces c ii** - blue sky research introduces chromalase ii tm 488nm 50mw diode laser module the chromalase ii tm 488 is a compact, 50mw, free-space laser diode system which provides greater value than dpss, direct doubled or optically pumped semiconductor lasers milpitas, calif. - december , 2009 **an overview of diode pumped solid state (dpss) lasers** - an overview of diode pumped solid state (dpss) lasers burhan davarcioğlu aksaray university, faculty of science and art, department of physics, 68100, ... doped with various rare earth ions and pumped by semiconductor lasers. fibre lasers were realized ... (ii) electrical pumping is used for gas and semiconductor lasers. it is realized **investor presentation - ii-vi** - oclaro semiconductor laser business case study. semiconductor . laser business target had a high unit cost structure with vertical integration and wide applicability in optical and industrial markets, ii-vi drove margin expansion over subsequent years. ii-vi laser enterprise revenue and operating margin. then (@ acquisition) 1. **ieee journal of quantum electronics, vol. 50, no. 3, march ...** - neous emission factor in subwavelength semiconductor lasers. furthermore, we analyze this dependence over 75k
